About Me

WATCH OUT! WALL OF TEXT!

Hello Hello

I'm a passionate software developer with 5 years of commercial experience spanning from backend to frontend, through full-stack development and automation testing. I thrive on turning ideas into reality through code, learning new frameworks and expanding my current knowledge. Beyond programming, I'm a huge gaming fan, reading/writing enthusiast and the number of hobbies I take on is too long to list, but we can talk about them! :) I'm excited to bring my technical skills, vivid imagination and problem solving skills to create something amazing.

Experience

SR. SOFTWARE ENGINEER Mobica Ltd.

2023 - 2024

- Conducting Technical Interviews: I led recruitment interviews, evaluating candidates' technical skills and their fit within the team.
- I worked on and enhanced APIs and an internal chatbot based on various text generation pretrained models (like LLaMA2), focusing on performance optimization and user experience.
- Mobile UI and API test automation software..

SR. SOFTWARE ENGINEER @ META Mobica Ltd.

2021 - 2023

- Creation of internal software and frameworks for back-end and automation testing used across multiple teams.
- Legacy code maintenance and updates.
- Code optimization and migration of stack from Python to TypeScript for cross-organization unification of tech-stack.
- Legacy code maintenance.
- DevOps.
- Leading a team of four people.
- Scrum master.
- Gamification of tasks
- Creation and maintenance of almost 1000 automated tests.
- Data analysis.
- i18n/a11y analysis/automation
- Working with multiple Android based devices and updating application logic to work with them.

SOFTWARE ENGINEER IMGW

2020 - 2021

- Automated manual tests & report generation for multiple clients with time-critical data.
- Worked extensively with API data manipulation and PostgreSQL databases for data analysis and visualization.
- Implemented RabbitMQ queueing systems, Eclflow workflows, and continuous integration pipelines.
- Optimized and refactored existing codebases, including migrating legacy Python 2 code to Python 3.
- Operated across Windows, WSL, and Linux environments.

PYTHON INSTRUCTOR IMGW

2020 - 2021

- Selected to become a Python instructor after six months at the firm.
- Prepared teaching materials and homework assignments, and evaluated student work.
- Led weekly instructional sessions and provided ongoing support to students.

Skills

No amount of text can fully capture the depth of my skills and experiences. While I've highlighted some key frameworks and expertise I've gained over the years below, this is by no means an exhaustive list. I'd be delighted to discuss my experiences in more detail, far beyond what can be conveyed here!

Programming Languages

Python	TypeScript	JavaScript
Java	Go	

Databases

SQL	PostgreSQL	SQLite
MongoDB		

Libraries/Frameworks/Tools

React	RabbitMQ	GraphQL
Pandas	Matplotlib	Dash
DearPyGui	Docker	Docker Compose
Flask	FastAPI	Express
NextJS	SolidJS	Node
AWS		

Version Control

Git	GitHub	GiLab
Bitbucket	Mercurial	

Testing

i18n/a11y	Regression	Automation
Functional	Smoke	UI
PyTest	Jest	Mocha
TestNG	Appium	

Education

Masters of Engineering
Grade: 2.1

Leeds Beckett University

2015 - 2020

Project Management

Agile	Scrum
Bitbucket	Mercurial
Jira	Slack
Confluence	Asana

Soft Skills

Leadership	Problem Solving
Adaptability	Crticial Thinking

And here's my doggo, cause he's been helping me with this CV, so he deserves a spot.
